Designed by you

THE IDEA BEHIND DESIGNSOFA IS TO FULFILL YOUR UNIQUE WISHES AND NEEDS WHEN CHOOSING YOUR SOFA.

We offer the market's most flexible sofa, which you have the opportunity to adapt to the dimensions of your home, design or comfort. Our mission is to adapt your sofa specifically to your wishes and needs.

For us, it is important that you still have the opportunity to choose a high-quality sofa, even if you want to design it yourself so that it lives up to your and your family's wishes. We want to adapt your sofa to your needs, in a high quality, and at a reasonable price.

Designsofa makes you the designer of your very own sofa, so you get exactly the unique sofa you have dreamed of.

DESIGNED BY YOU, PRODUCED BY SKILLED CRAFTSMEN!

Every single designsofa goes through a dedicated process from your design to delivery.

Once your design is ready, this will be sent to the factory, where some of Europe's most skilled and experienced craftsmen will begin production of your unique sofa.

The components are ordered at home according to your wishes, the FSC-certified wood is cut to your measurements, the body is assembled around the frame of solid beech wood, on which springs and comfort material are mounted.

At the same time, specialists select the textile or leather placement, then cut it to size on modern machines, after which the look of your unique sofa is tailored with the beautiful, perfectly straight double stitching and the classic look, which is a trademark of designsofa.

Body and upholstery meet with skilled upholsterers, who mount the upholstery on the body and cushions, after which the sofa undergoes a comprehensive quality control that ensures that your sofa stands exactly as a designsofa should. After quality control, the sofa is transferred to the knife-free packaging department, which secures your unique sofa against damage during transport, and your sofa is now ready to be shipped, to eventually be placed exactly where you want your designsofa to be placed.

QUALITY IN THE DETAIL!

A designsofa is not just your choices. We have made a number of quality choices for you.

Designsofa allows you to choose dimension, height, comfort, material, etc. but we made the choice of the quality of the sofa for you!

Designsofa therefore has a 10-year break guarantee on our FSC-certified solid beech wood frames, just as the body is a fully constructed wooden construction, all carved to your exact measurements in 5 cm intervals.

The perfect beautiful double stitching on specially selected leather or textile, the classic look, which is created via extra comfort material between foam and cover and a beautifully closed construction, are also among the brands for the quality of designsofa.

FROM FORM AND SIZE TO COMFORT AND DESIGN, YOUR WISHES AND NEEDS ARE IN FOCUS!

Designing your own sofa deals with a number of choices in Europe's largest sofa concept.

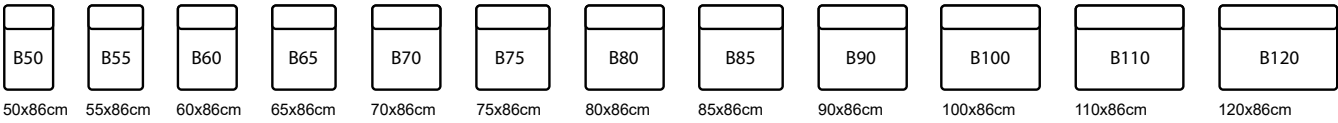

You choose freely

- shape of the sofa in the choice of modules
- width of the modules, which can adapt with 5cm precision to your room.
- among the many arms and accessories.
- leather or textile - even your very own
- design - the classic or modern expression,
- short or standard seating depth
- sitting and back comfort
- ordinary or fire-retardant foam
- height and design on legs.

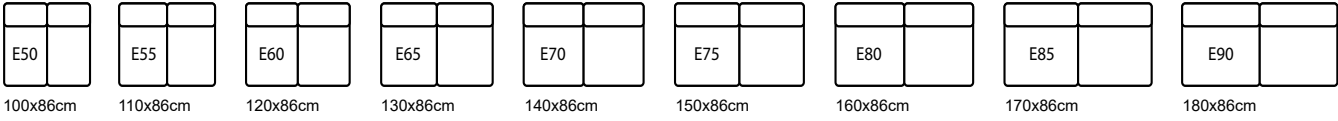

With precise measurements and a myriad of choices, you create your own unique sofa, preferably via our 3D design program, where you can easily visualize your choices.
